

Friends,

Photos and Video of our new Mandala Hall (completed this year) that we use for morning and evening meditation and Sunday ceremonies. Because it is large (approx 500 square feet) we can socially distance and it has windows in the four directions with plenty of cross ventilation, We are planning to install a propane heater (which can be seen on the floor in the video) for the winter. Thank you to everyone who helped make this possible and we look forward to welcoming you when conditions allow. RM Aurelian took the photos and video.
